

## News Release

-Maxarya's 2009 recumbent bicycles are ready now! They are the most refined bikes we have ever produced.

We've applied over 55 upgrades to them since 2005 and over 150 since 1999! Newly redesigned and more comfortable seat, keyless stem adjustability, new colours, redesigned fork, new transmission system and upgraded components are some of them.

You will feel the refinement just after a short test ride!

-Maxarya has developed several new accessories and options including the long-awaited rear carrier rack, upgraded adjustable kickstand, unique touring handlebar and an innovative folding stem mechanism, which allows you to adjust your handlebar stem at any angle you wish. It's also great solution for easier transportation and storage.

-We have several innovative and exciting products for 2009. They will be posted on our website early next year. Come back and have a look.

-We love to hear from you. Please share your thoughts and experience with others and us.

It's not only an exchange of thoughts but also a great way of feedback analysis allowing us to improve our products and offer better services to you. If you already own one of our bikes you will receive a practical gift as well!
